OBJECTIVE

Motivated Software Developer with a strong foundation in Core Java and front-end web technologies (HTML, CSS, JavaScript, React.js). Dedicated to building end-to-end applications by designing responsive user interfaces and implementing robust, scalable backend logic.

SKILLS

Programming Languages:	Core Java, C++, JavaScript, Python
Frameworks & Web Technologies:	Spring Boot, React.js, HTML5, CSS3, REST APIs
Core Java Concepts:	OOP, Collections Framework, Multithreading, Exception Handling
Database:	SQL, MySQL
Tools & Technologies:	Git, GitHub, ServiceNow, IntelliJ IDEA
UI/UX Design:	Figma
Soft Skills:	Critical Thinking, Data-Driven Decision Making, Project Ownership

EDUCATION

Vignan's Institute of Information Technology	Aug 2023 - Apr 2026
Bachelors of Engineering in Computer Engineering	

PROFESSIONAL EXPERIENCE

Java Developer Intern TechDenali	Feb 2026 - Apr 2026
- Completed a rigorous offline internship focused on enterprise-level application development within an Agile environment. - Applied Object-Oriented Programming principles and Core Java concepts to build and optimize backend processing logic. - Collaborated with senior developers during Daily Stand-ups and Sprint Planning to manage data structures, debug code, and ensure efficient application performance.	
Web Developer Intern Internpe	May 2024 - Jun 2024
- Collaborated with cross-functional teams (Product, QA, UX) to help define project requirements and implement web solutions. - Gained hands-on experience bridging front-end React interfaces with backend systems, ensuring smooth product delivery.	
UI/UX Designer CodeSoft	Feb 2024 - Mar 2024
Translated user needs into interactive UI prototypes using Figma. Collaborated with design teams to enhance user experience and presented solutions that improved design workflow efficiency by 25%.	

CERTIFICATIONS

- ServiceNow University (ServiceNow Certificate)
- CISCO (Python Essential 1, Python Essential 2, Introduction to Networks)
- EDX (Introduction to Relational Database Basics)
- Infosys Springboard (Front-End Web Developer)

PROJECTS

CLEARX - Ecommerce Platform
- Identified a market need (\$18B+ annual loss for retailers) and developed a platform connecting retailers, customers, and delivery agents to solve food waste challenges. - Built the core business logic utilizing Core Java, while designing and building interactive UI components using React.js and CSS.
Child Therapy Services Website – Hospital Website
Translated client requirements into a responsive website. Designed and managed the development of a client booking system and accessibility features to improve key metrics.
Real-Time Face Recognition System - AI/ML
Developed a real-time face recognition system using Python/OpenCV. Validated data outputs for identification accuracy and conducted research on product-market fit.

POSITIONS OF RESPONSIBILITY & RECOGNITIONS

Student Activity Counsellor (SAC) - Vignan's Institute of Information Technology
Managed and organized multiple cultural and technical events, collaborating with internal stakeholders and analyzing feedback to drive student participation and growth.
National Level Hackathon Winner SUSHACKS
Secured 1st place in Sushacks Hackathon out of 120 teams and 480+ participants.
